

VOLTV

Rate it. Roast it. Share it.

The social network for movie lovers — where every rating is a post, every film has a feed, and taste becomes a status game.

THE PROBLEM

Movie discovery and conversation are broken across three silos:

- **IMDb / Rotten Tomatoes** — rich data, zero culture.
- **Letterboxd** — great for cinephiles, but desktop-first, slow, Western-skewed.
- **Twitter / Reddit / WhatsApp** — real debates happen, but posts vanish, ratings don't exist, nothing is anchored to a film.

Gen-Z streamers waste hours scrolling streaming apps with no single home to share what they loved, hated, or can't stop thinking about.

THE SOLUTION

A mobile-first platform that fuses **X-style feeds + Letterboxd-style tracking + TikTok-style discovery**.

- 🎬 **Social feed** of hot takes & star ratings, every post tied to a film
- 🗣️ **Mood + decade + country + Movies/TV/Anime** discovery filters
- 📺 **Public Collections** that let power users build audiences
- ⚡ **XP, streaks, leaderboards, blue-tick critics** — taste as status
- 🌍 **Global catalog from day one** — regional cinema first-class

TARGET MARKET

Primary: Gen-Z & younger millennials (18–34), active streamers who already post opinions on social media.

Launch markets: India, Nepal, Bangladesh, SEA, US diaspora.

Segment	Size	Notes
TAM — Global streaming subs	~1.8B	Omdia, 2025
SAM — 18–34 streamers in launch markets	~350M	India 180M · SEA 90M · US 80M
SOM — Year 1–3 addressable	3–5M users / 500K MAU	~1.5% of SAM, Letterboxd benchmark

WHY WE WIN

- **Social-first, not database-first** — feed is the home
- **Gamified taste** — XP & leaderboards Letterboxd avoids
- **Global-first catalog** — regional cinema native
- **Creator-ready** — Collections + follower graph unlock paid curation

PRODUCT STATUS

Live MVP shipped on Next.js 16, Prisma, Supabase, TMDB:

BUSINESS MODEL

- **Freemium** — free tier with ads
- **VOLTV Pro — \$3/mo** — ad-free, advanced stats, badges, early drops
- **Affiliate streaming referrals** — JustWatch-style "Where to watch"
- **Sponsored Collections** for studios & streamers

Revenue target: 100K Pro subs → ~\$3.6M ARR, before ads & affiliates.

THE ASK

Raising some funds to scale to 500K MAU across launch markets, ship iOS + Android apps, and hire 2 engineers + 1 community lead.
